

ZONING

73 Attachment 13

Town of Chenango

§ 73-56. Attachment XIII: Schedule of Regulations, Aquifer Recharge Area. [Added 8-19-1991]

The following land use activities may not be initiated or carried on in Zone II after enactment of this chapter:

- (1) The construction of septic systems with a maximum flow rate exceeding 1,000 gallons per day.
- (2) The uncovered outdoor stockpiling of more than 100 pounds of manure.
- (3) The construction of facilities for the below-ground storage of hazardous or toxic materials except where leak detection systems and/or secondary containment structures are installed.
- (4) The landfilling of refuse, radioactive materials, toxic materials or hazardous materials on or below the ground surface.
- (5) The siting of junkyards or metal salvage operations.
- (6) The construction of pipelines that carry toxic or hazardous materials over distances exceeding 100 feet.
- (7) The uncovered outdoor storage of road salt.
- (8) The construction or operation of a private septic system of any size within the boundaries of a town sewer district. **[Added 9-13-1993]**
