NOTES:

¹ "Window wall" shall be defined as the elevation in townhouses or apartments containing access to the privacy yard or balcony. Window wall to window wall measurements shall be perpendicular to the building face.

² Where a minimum twenty-foot-wide vegetated area consisting of pine and/or oak trees with a predominant canopy height of 30 feet is preserved between buildings.

³ Where open areas, including streets and parking, are located.

⁴ Computed by taking the longest running dimension of a building and creating a square in which the building is to be located.

⁵ Should a townhouse be stacked where there is more than one unit vertically, the maximum units shall be increased to 16.
