Attachment II-C Off-Site Parking Facilities Landscape Diagrams [Added 6-17-2013 by L.L. No. 5-2013]

Figure 266-5
Landscape Strips

(2) Option 2: Other landscape patterns.

- Interior landscaping must be arranged in areas at the ends of rows of parking or between parking spaces within rows of parking. See Figure 266-6.
 - Interior landscaping may join perimeter landscaping as long as the interior landscape area extends at least 4 feet into the parking area from the perimeter landscape line. See Figure 266-6.
 - Landscaping that abuts, but does not extend into, the parking area may be included as interior landscaping if all of the following are met:
 - The abutting landscaped area must be in addition to required perimeter landscaping;
 - Only the first 10 feet of the abutting landscaped area, measured from the edge of the parking area, may be included as interior landscaping. See Figure 266-6; and
 - The landscaped area is not abutting and parallel to required perimeter landscaping. See Figure 266-6.
- g. Individual tree-planting spaces. Where an individual tree is planted in a space surrounded by pavement, the planting area must have a minimum interior dimension of five feet. See Figure 266-7.
